

PRESENTATION TEMPLATE · 2026

Slides title goes here.

A one-line subtitle that frames the deck — clear, specific, and written in plain English.

A BRAND-FIRST TECH STUDIO

Title

What we'll cover

01	Where things stand today	The problem
02	What we propose	The approach
03	How it works in practice	The plan
04	What success looks like	The outcome

01

Section title

One line describing what this section is about.

Heading goes here

- First supporting point — kept to a single, scannable line.
- Second point that adds the next piece of the argument.
- Third point, with a number or a name to make it concrete.
- Fourth and final point — never more than four.

Heading

Paragraph text sits beneath the heading, anchored to the lower third of the slide. Use this layout when a single idea needs room to breathe — one heading, one short paragraph, and a generous field of white above.

Two columns of text

First column

Use a two-column layout to compare two related ideas, or to split a longer explanation into digestible halves. Keep each column to a tight paragraph.

Second column

The second column mirrors the first. Parallel structure makes the relationship between the two clear at a glance — same length, same shape.

Let's learn how to make it happen.

DEFINITION

Positioning

/ noun / The deliberate choice of who you're building for and why you're different — settled before a single line of the story gets written.

KEY TAKEAWAY

The single sentence you want the room to remember when they walk out.

//

**An interesting quote that showcases a point
of view worth pausing on.**

The only true wisdom is in knowing you know nothing.

Socrates · Philosopher

Is it what the end looks like?

I don't know — you tell me.

FULL-BLEED IMAGE

Caption headline over the image

A short caption sits inside a protection gradient at the base.

OVERLINE

Heading beside an image

Text on the left, image on the right. The most reliable workhorse layout — explanation paired with a single supporting visual.

- One key detail
- A second detail

Heading

IMAGE

IMAGE

Heading

Images on top, heading and paragraph anchored beneath them.

OVERLINE

Heading

Three images stacked beside a heading. Good for a sequence or a set of related views.

Heading

Two larger images stacked beside the heading when each visual deserves more room.

Gallery grid

BACKGROUND IMAGE

Heading

A solid panel floats over the image to carry the words — sharp corners, no shadow.

Paragraph text.

Sub heading

Paragraph text.

IMAGE

OVERLINE

A narrow image, wide text

A full-height image column on one side balances a generous text area on the other. Flip the columns to alternate rhythm between slides.

Three cards

Heading 3

Short description line for this card.

Heading 3

Short description line for this card.

Heading 3

Short description line for this card.

87%

One sentence that explains what the number means and why it matters.

Three metrics at a glance

2 wk

Sprint length from kickoff to clarity

SHARE

A single percentage, framed

A donut puts one ratio front and centre. Pair it with a sentence that says what the slice represents and why it's worth attention.

Two figures, side by side

Before

Conversion at the start

After

Conversion after the sprint

A four-step process

STEP 01

Diagnose

Ask the questions you're too close to answer.

STEP 02

Position

Settle brand and product direction together.

STEP 03

Articulate

Turn clarity into messaging and a website.

STEP 04

Build around it

Ship the product with the story already set.

MILESTONES

A horizontal timeline

Roadmap by quarter

Q1 Clarify	Q2 Build	Q3 Launch	Q4 Scale
■ Positioning ■ Audience	■ Website ■ Messaging	■ Go-to-market ■ First sales	■ Iterate ■ Series A prep
